

**Amendment to the Specification:**

Please replace the paragraph at page 16, line 5 with the following amended paragraph.

**Example 1**

Example 1 is a ~~bottles~~ bottle having a monolayer structure that is made of a metallocene polyethylene polymer/homopolymer high density polyethylene blend. The metallocene ~~polyethylene~~ polyethylene polymer and homopolymer high density ~~polyethylene~~ polyethylene are both present in the blend at 50% by weight of the blend. The metallocene polyethylene polymer is Atofina Finacene BM359 SG. The homopolymer high density polyethylene used is Atofina Finathene BM961.
